

CMIP5-Research conditions of use

- a) I agree to restrict my use of CMIP5 model output for non-commercial research and educational purposes *only*.
- b) I will hold no individual(s), organization(s), or group(s) responsible for any errors in the models or in their output data.
- c) In publications that rely on the CMIP5 model output, I will appropriately credit the data providers by an acknowledgment similar to the following:

"For their roles in producing, coordinating, and making available the CMIP5 model output, we acknowledge the climate modeling groups (listed in Table XX of this paper), the World Climate Research Programme's (WCRP) Working Group on Coupled Modelling (WGCM), and the Global Organization for Earth System Science Portals (GO-ESSP)."

- d) I understand that Digital Object Identifiers (DOIs used, for example, in journal citations) will be assigned to various subsets of the CMIP5 multi-model dataset, and when available and as appropriate, I will cite these references in my publications. I will consult the CMIP5 website (<http://cmip-pcmdi.llnl.gov/cmip5/>) to learn how to do this.
- e) I acknowledge the potential limitations of the data obtained from this archive. These may include (but are not necessarily limited to) errors in the models, shortcomings in the experiment designs, the conjectural quality of the forcing scenarios used to drive the models, and so on.
- f) I understand that although the model output has been subjected to a quality control procedure, unrecognized errors almost certainly remain.
- g) To aid participating groups in understanding and improving upon their models behaviors, I will respond to reasonable requests from the WGCM for feedback about my CMIP5 research results (e.g., reporting model deficiencies, recording CMIP5 publications, etc.).
