

BADC conditions of use

- The BADC will store details of what you intend to use the dataset you have selected for. The principle investigator(s) and other persons needed to administer and monitor the datasets use may be given these details.
- The BADC uses cookies to maintain session information for web downloads.

Terms and Conditions for data and information provided by the NERC/BADC

Exclusion of Liability

Your use of information provided by NERC is at your own risk. Please read any warnings given about the limitations of the information.

NERC gives no warranty as to the quality or accuracy of the information or its suitability for any use. All implied conditions relating to the quality or suitability of the information, and all liabilities arising from the supply of the information (including any liability arising in negligence) are excluded to the fullest extent permitted by law.

NERC gives no warranty as to the accuracy or completeness of data or images in the form in which they are cached or downloaded to your computer, as they may be affected by on-line conditions over which NERC has no control.

Notes on Limitations

- Scientific observations are made according to the prevailing understanding of the subject at the time. The quality of such observations may be affected by subsequent advances in knowledge, improved methods of interpretation, and better access to sampling locations.
- Raw data may have been transcribed from analogue to digital format, or may have been acquired by means of automated measuring techniques. Although such processes are subjected to quality control to ensure reliability where possible, some raw data may have been processed without human intervention and may in consequence contain undetected errors.
- Detail clearly defined and accurately depicted on large-scale maps may be lost when small-scale maps are derived from them.
- Although samples and records are maintained with all reasonable care, there may be some deterioration in the long term.
- The most appropriate techniques for copying original records are used, but there may be some loss of detail and dimensional distortion when such records are copied.
- Data may be compiled from the disparate sources of information at NERC's disposal, including material donated to NERC by third parties, and may not have been subject to any verification or other quality control process.
- Data, information and related records which have been donated to NERC have been produced for a specific purpose, and that may affect the type and completeness of the data recorded and any interpretation. The nature and purpose of data collection, and the age of the resultant material may render it unsuitable for certain applications/uses. You must verify the suitability of the material for your intended usage.
- The data, information and related records supplied by NERC should not be taken as a substitute for specialist interpretations, professional advice and/or detailed site investigations. You must seek professional advice before making technical interpretations on the basis of the materials provided.
- If a report or other output is produced for you on the basis of data you have provided to NERC, or your own data input into a NERC system, please do not rely on it as a source of information about other areas or features.
