

CASIX Data Conditions of Use

1. Access to the CASIX data archive will be restricted to CASIX scientists only, during a dataset specific restricted access period (1 year after the final archival date), after which data and model results will be released to the public domain.
2. Whilst the data are restricted from the public domain, no data should be transferred to a third party without the originator's consent.
3. Whilst the data are restricted from the public domain, each principal investigator has the right to refuse to allow his/her work, whether measurement or calculation, to be used in a publication or presentation prior to the PI's own publication of that work.
4. If measurements or model results from CASIX research are used in a publication, joint authorship must be offered. This does not necessarily have to be accepted, particularly in cases where due credit and acknowledgement can be given in other, possibly more appropriate, ways.
5. In all cases where data are used in a presentation or publication, an acknowledgement must be given: for example: "Data from CASIX are provided via the NERC Earth Observation Data Centre (NEODC)."
6. Information submitted in application for access to the data will be made available to : The Natural Environment Research Council (NERC) and its delegated authorities, i.e. the NERC Earth Observation Data Centre and the British Atmospheric Data Centre (BADC) and their host organisation, the Science and Technology Facilities Council (STFC) for the purposes of tracking data usage and of improving the service.
