

Data from the Environmental Baseline project are available to all registered CEDA users, however in addition to the Open government licence <http://www.nationalarchives.gov.uk/doc/open-government-licence/version/3/> if you use these data, please note the additional requirement to acknowledge use as follows:

Use of data and information from the project: "Science-based environmental baseline monitoring associated with shale gas development in the Vale of Pickering, Yorkshire (including supplementary air quality monitoring in Lancashire)", led by the British Geological Survey

Permission for reproduction of data accessed from the CEDA website is granted subject to inclusion of the following acknowledgement:

"These data were produced by the Universities of Manchester and York (National Centre for Atmospheric Science) in a collaboration with the British Geological Survey and partners from the Universities of Birmingham, Bristol and Liverpool and Public Health England, undertaking a project grant-funded by the Department for Energy & Climate Change (DECC), 2015-2016. "
