

## **FREE - Flood Risk for Extreme Events**

### **Conditions of data access and use**

Access and use of FREE data is subject to the following conditions:

- Data will be embargoed for 2 years after the end of the programme unless this is prohibited under EIC regulations or the embargo waived by the data provider. This embargo is to allow the PI and co-workers to exploit it in the first instance. The metadata will NOT be embargoed, allowing the wider community to be aware of work being carried out under FREE and facilitate community building.
- Data will be made available IMMEDIATELY to the wider FREE community for use in FREE projects, and publicly available 2 years after the end of the programme.
- Anyone making use of FREE data during or within 2 years of the end of the programme will be required to include the PI and/or co-workers (as appropriate) as co-author/s on any resulting papers, if the PI and/or co-workers so desire.
- PIs making use of FREE data are responsible for ensuring that the data used in publications are the best available at the time.
- While data are restricted from the public domain, no data will be transferred to parties outside the programme, or used for non-FREE related activities, without the explicit agreement of the originator. In addition, guidance will need to be sought from the Science Coordinator and the Steering Committee if major data transfers are involved, to avoid compromising the interests of other programme participants.

In the event of dispute, the final decision rests with the FREE Science Coordinator and the Steering Committee.

*I agree to abide by the terms and conditions for usage of FREE - Flood Risk for Extreme Events data as stated above.*
